Agronomical experiments with *Stevia rebaudiana*: Use of Herbal Solutions. 1. ICD/U based Herbal Solution No.59.

Pankaj Oudhia

Introductory Note

Stevia rebaudiana is establishing as promising crop in India but still not much information about its improved farming is available. Farmers are cultivating it as per their traditional crop growing knowledge or using literatures given in Internet. It is bare fact that not much work has been done on different aspects of Stevia cultivation in India. With the help of innovative Stevia growers I got opportunities to conduct series of experiments on Stevia using hundreds of herbs and herbal solutions. Ecofriendly pest management, improved crop growth to production of medicinally rich Stevia were the targets.

The present series is an effort to give preliminary information about these Agronomical experiments. Let's hope that this information will encourage the researchers as well as farmers around the world to use these promising Herbal Solutions for Stevia production.

No. of ingredients: 14

Source of Ingredients: Wild.

No. of methods tried: 15.

Effect of Herbal Solution: Positive effect on quality.

Farmer's rating: 9**.**

Cost of application: Low.

Whether this solution can be improved? Yes.

Whether this solution tried on other medicinal and aromatic crops? Yes.

Whether this solution tried on traditional agricultural crops? Yes.
