

Musli Pak (Classical and Improved) as Indigenous Herbal Medicine for Sexual Health (Aphrodisiac): Pankaj Oudhia's Medicinal Plant Database

Pankaj Oudhia

Abstract

Musli Pak prepared by using Safed Musli as main ingredient is popular Indigenous Herbal Medicine in Global Market. Its popularity is increasing like wild fire. In general, classical Musli Pak is prepared by using 20 to 24 ingredients. In rural and forest areas of India where Traditional Healing is practiced the Traditional Healers prepare Musli Pak by using entirely different herbal ingredients with Safed Musli. They use as many as 200 ingredients with Safed Musli. The Musli Pak available in Global Market has many limitations. Although it is said to be useful for everyone but it is not true. The classical Musli Pak must be used under supervision of experts specially when patients suffer from Psoriasis, Sickle Cell Anemia and even common health problem like constipation. The variants of Musli Pak prepared by Traditional Healers are free from these limitations.

In India not much work has been to document and evaluate these variants. Pankaj Oudhia has documented these formulations in its original form.

This research document shows the list of topics discussed in Pankaj Oudhia's Medicinal Plant Database on Improved Musli Pak in reference to Sexual Health. For details please visit
