

Ankol (Alangium) based Indigenous Herbal Medicines for Bleeding Piles (Hemorrhoids): Pankaj Oudhia's Medicinal Plant Database

Pankaj Oudhia

Abstract

Since time immemorial, root of Ankol (*Alangium salviifolium* Lam.) is in use in treatment of Bleeding Piles. The ancient literature related to different systems of medicine in India and other countries describe simple Formulations of Ankol root in which 3-4 ingredients are added and used but in rural and forest areas of India where Traditional Healing is practiced, the Traditional Healers use Ankol root in combination with tens of herbs. Although billions have been wasted in the name of Traditional Knowledge documentation by the authorities but still the Traditional Knowledge about these Ankol Formulations is not available to modern researchers. Pankaj Oudhia has documented these formulations in its original form.

This research document shows the list of topics discussed in Pankaj Oudhia's Medicinal Plant Database on Ankol in reference to Bleeding Piles. For details please visit <http://www.pankajoudhia.com>
